**Market
Gardeners
Wholesale Price
List**

FROM
GEORGE H. PRICE,
SEEDSMAN
ALBANY,
N. Y.

For Market Gardeners Only

D. N. Shoemaker

ESTABLISHED

NINETY-SIX YEARS

To the

Market Gardening Trade.

This list is published for the benefit of parties who are doing a market gardening business and want good seed as low as it is possible to procure it. The prices are as low as a strictly prime quality of seed can be sold for. It does not pay to plant poor seed even if you get it for nothing. I claim to have as good as any one, and my long experience in the business of growing, handling and importing enables me to furnish customers with first-class seeds which will always give them the very best of satisfaction. I take great care in producing my stocks to have them true and pure, and test everything to determine the germination before selling, making a thorough system of it, and never sending out anything which does not grow well. This, taken in connection with my system of using nothing but the best stock seeds and carefully watching the crops, gives customers the most ample protection. I list all the good standard varieties and some new sorts of value which it will pay you to try.

We ship goods very promptly. If possible, your order is shipped the next day after it is received.

SEEDS BY MAIL. Seeds can be sent to all parts of the United States by Parcel Post at the regular Parcel Post rates, so in ordering please add postage. Packets and ounces we will send free of postage.

IN ORDERING, please write your name, post-office address, county and state distinctly and in full. From carelessness in writing the name and address indistinctly we often have much difficulty, and our customers suffer from delay in receiving seeds until the proper name and address is obtained.

Always send explicit shipping instructions with *each* order.

MONEY can be sent safely by post-office order, express money order, bank draft or check. Bills or postage stamps can be safely sent by registering your letter at a cost of 10 cents, which can be done at any post-office in the United States.

CUSTOMERS at a distance can procure seed as easily by mail as if they came in person to buy it. Orders from parties unknown to us must be accompanied with cash or a satisfactory reference.

We make no charge for barrels or boxes and deliver orders free on board cars or steamers.

BAGS AND SACKS as containers are charged at cost and are **NOT RETURNABLE**.

Customers may furnish their own bags, if preferred, but bags must accompany the order.

WE DO NOT WARRANT seed because, as is well known, so many causes may, and often do, prevent the best seeds from growing and producing crops, from no fault of the seeds. We therefore, in common with all other reliable seedsmen, wish it distinctly understood that, while we believe them to be of the best quality, we sell no seeds with warranty, express or implied, in any respect, as to description, purity, productiveness, or any other matter of any seeds we send out, and will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms, they must be returned at once, and the money that has been paid for same will be refunded; but should the failure of a crop be due to the seed not germinating, from any fault of the seed, we will refill the order for such seeds without any charge for it, but our responsibility is limited to this extent; we never sell any seeds that we do not believe to be of the best quality and kind.

Market Gardeners Wholesale Price List

The following pages contain the prices of the Standard Vegetable Seeds and those new varieties which it will pay the Market Gardener to plant. In some cases our prices may be a little higher than those of other catalogues, but it must be borne in mind that seeds which are grown from selected stocks are more expensive than those which are taken from the whole crop just as it runs. It pays the Market Gardener to have the best. He might save a dollar or two on his bill in buying low-priced seed and lose a hundred or two on his crop. Read remarks on page 2.

Seeds can be sent to all parts of the United States by Parcel Post at Parcel Post rates, so in ordering by mail from this list please add postage on 1-4 lb., pints and upward. Packets and ounces we will send free of postage.

Prices in this list are liable to advance at any time without notice. All bills are due July 1st, Read remarks on page 2.

DISINFECTANTS AND INSECTICIDES FOR SPRAYING.

When ordered by mail add postage at Parcel Post Rates. Liquids cannot be sent by mail.

Spraying is no longer an experiment; it is an accepted practice, if you desire to grow Perfect Vegetables, Fruit or Flowers. If you wish success with fruit you will have to spray your trees. It is impossible to raise fruit successfully without spraying. Spray, not sprinkle, until the solution begins to drip from the leaf.

WHEN TO SPRAY.—The time of making the application varies with the season. As a rule, for garden fruits, when the insects first appear; for orchard fruits, or the more common insects, just before the fruit buds open, and just after the blossoms fall. Never spray a tree when in blossom.

With the special pumps and prepared insecticides now on the market, the labor of successfully combating with nearly all injurious insects is very easy. We carry in stock the very best and most complete line of insecticides, also, fungicides, spray pumps, hose and nozzles.

INSECTICIDES

HAMMOND'S SLUG SHOT.

HAMMOND'S GRAPE DUST.

HAMMOND'S KEROSENE EMULSION.

DRY BORDEAUX AND PARIS GREEN COMPOUND.

POWDERED SULPHUR.

BOWKER'S PYROX.

ARSENATE OF LEAD — Paste and Dry.

PURE PARIS GREEN.

PRUNING TOOLS.

GRAFTING TOOLS.

LAWN MOWERS.

Market Gardeners are familiar with most of the standard varieties of vegetable seeds that are offered to the Market Garden trade by seedsmen at the present time.

I would like to call your attention to a few varieties that are especially adapted to the
MARKET GARDEN

BEET

- Extra Early Flat Egyptian** Is the best for sowing in frames and transplanting in the open ground. We find they will make roots fit to bunch a week before any other variety treated in the same way.
- Albani** Turnip shaped. Bright scarlet color, very early open ground variety a good buncher.
- Early Wonder** A globe shape variety dark in color very uniform, early, good size top one of the best early bunching sorts.
- Boston Crosby** A very fine selection from Crosby Egyptian, roots more uniform and Turnip shaped, very dark flesh, good size top. It makes a splendid bunch beet.
- Detroit Dark Red** Is no doubt the best for general crop or winter roots. It is very dark and holds its color. It is used extensively by canners as well as Market Gardeners.

CARROT

- Price's Early Horn** An early bunching variety scarlet in color, roots about three inches long, bunches earlier than Chantenay.
- Chantenay** The best bunching variety. The matured roots are from five to six inches in length, uniformly half long or stump rooted, but tapering slightly deep Orange red in color, crisp and tender.
- Hutchinson (Danvers)** This strain tapers only slightly from top to bottom, ending in abrupt stump root. Grows about an inch out of ground and has a slight green top.
- Bagley (Danvers)** This strain is very similar to Hutchinson, only the entire root grows in the ground. This variety has no slight green color at the top, it is a very firm fleshed variety, excellent color, and long keeper. It makes splendid Fall and Winter roots.

CELERY

- Golden Plume** Is becoming very popular among the large Market Gardeners. It is Easy Blanching Celery crossed with Golden Self Blanching a new Golden type of Easy Blanching, less subject to rust and blight, and a stronger and better keeper.
- Price's Bonnie Green** Our own introduction of this special strain of Easy Blanching Celery. The easiest and quickest to Blanch, excels all other sorts of Easy Blanching in quality. The plants are of medium height, of great vigor. The stalks are tender and brittle.

CABBAGE

- Copenhagen Market** We wish to call your attention to this strain. It is Holland grown, and will mature just as early as Jersey Wakefield. The heads are exceptionally large for so early a variety, very solid, and of most excellent quality.
- Truckers Favorite** Our strain is Holland grown and can be depended upon. Its keeping qualities, solidity and weight of heads cannot be beaten. Its stem is medium. It is one of the best late Cabbages we know of.
- Price's Autumn King** A Danish strain larger than Danish Ball Head, round head slightly flattened, grows a very hard head on good soil, a good Fall and Winter variety.

CAULIFLOWER

- Price's Pedigree Snowball** The perfect Cauliflower, for early Summer or Fall crop. It is of compact upright habit, quick growth and sure heading, seed is Danish grown.

CUCUMBER

- Price's Hybrid** A splendid dark green color and a heavy yielder. It can be used as an early or general crop cucumber.

SPINACH

- Princess Juliana** A heavy dark green crumbled leaf variety, which stands a long time before going to seed. A splendid hot weather Spinach.
- Long Standing Savoy** A type of Savoy heavier in growth, darker green and much longer standing than any other variety of Savoy Spinach.

TOMATO

- Apex** A new extra early scarlet variety. The fruits are large for so early a variety, round or slightly flattened, of deep scarlet red color, smooth, free from cracks with less green about the stem, continues to yield marketable fruits for a longer period than the other first varieties. It is very productive.

- Price's Superb** A red Tomato, as early as (Chalks Jewell) or (Bonny Best) smooth and solid, will yield more and larger perfect fruits later in the season than either of the above mentioned varieties. We have had many satisfactory reports on this variety, from Market Gardeners the last two seasons.
